Baking the Cake

Bake your cakes with care and you'll always start with a perfect decorating surface—that way your decorating will really shine! What is the perfect cake for decorating? Smooth, golden brown surface, very few crumbs and a nice, springy crust. Here’s the easy way to get it right:

1. **Preheat oven** to the temperature specified in your recipe.
2. **Prepare the pan.** You can either use solid vegetable shortening and flour or Wilton Cake Release. Never use butter, margarine or liquid vegetable oil—they’ll make your cake stick and possibly burn the surface. Apply shortening or Cake Release inside the pan with a pastry brush or paper towels. Spread so that all indentations are covered. When using shortening, you’ll need to sprinkle about 2 Tablespoons of flour inside the pan and shake so that flour covers all greased surfaces. Turn the pan upside down and tap lightly to remove excess flour. If any shiny spots remain, touch them up. If you're using Cake Release, all you do is apply it inside the pan—no need to add flour.

3. **Bake the cake.** When baking in Wilton pans, use the recommended batter amounts and the specific baking instructions provided with the pan. Pour cake batter in pan, spread evenly with a spatula and tap the pan on your counter top to remove air bubbles. Bake on the middle rack of a preheated oven for the time specified in the recipe. To test whether cake is done, insert a toothpick or cake tester near center and remove. If tip is clean, cake is done. If batter is visible, bake a little longer until toothpick or tester comes out clean. When done, remove your cake from the oven and cool in the pan on a rack for 10 minutes.

4. **Unmold the cake.** Place a cooling rack against the cake and turn both cooling rack and pan over. Lift pan off carefully; cool at least one hour. Brush off any loose crumbs before icing.

WILTON BAKEWARE

Each Wilton pan is built with features that consistently bake cakes with a perfect decorating surface: Thicker construction to prevent warping. Quality aluminum for even heating. Today, Wilton has more shapes, sizes and finishes of bakeware than any other brand. If you want to start your cakes right, begin with a Wilton pan.

---

CAKE RELEASE

Don’t take a chance that your cake will stick to the pan. With Cake Release, you can be sure your cake will come out of the pan easily, with a perfect golden decorating surface. The exclusive Wilton formula coats in one step, replacing the two step grease and flour method.
Leveling the Cake

After the cake has cooled one hour, you will need to level it. This is true for all cakes, even for shaped cakes, like a bear cake. Leveling removes the crown from the cake center and gives you an even decorating surface.

Trim off the raised center portion using a serrated knife or a Wilton Cake Leveler. (We recommend using the Cake Leveler.)

If using a knife, place the cake on a cardboard cake circle, then place on a Wilton Trim 'N Turn Turntable. While slowly rotating the turntable, move the knife back and forth across the top of the cake in a sawing motion to remove the crown. Try to keep the knife level as you cut. Brush off all loose crumbs. If you’re using the Cake Leveler, start with your cake on a cardboard cake circle. Measure the height you want to cut from your cake, then position the ends of the cutting wire into the side notches to reach that height. Keep the legs standing level on your work surface, and cut into the cake, using an easy sliding motion.

Cutting and Wrapping the Board

For round, square and sheet cakes, you don’t need to cut the cake board. Just use a board that is 2 inches larger than your cake. (If the cake is 8 in. diameter, buy a 10 in. round board.) For shaped cakes, like the bear on page 19, you will need to cut a board to fit: Turn pan upside down and trace onto your cake board, leaving 1 in. extra around the edges. Cut board with a craft knife. Next, trace the cut board onto Fanci-Foil Wrap, making outlines 3-4 inches larger than the board.

Now, wrap the board: Cut Fanci-Foil along outline. Place your board, white side down, on top of your cut foil. Cut deep slits at several points along foil edge, creating tabs of foil to wrap neatly around the board. Secure foil tabs to the board with tape.

WILTON TRIM 'N TURN TURNTABLE
Puts your cake just where you want it for decorating. Wilton students have used it for years—it turns smoothly so you can ice the sides without stopping every few inches. Great for serving too!

CAKE BOARDS
The prettiest way to present your cake is to place it on a Wilton Cake Board, wrapped with our Fanci-Foil Wrap. Strong, corrugated Wilton boards keep the cake secure when you’re serving. After the party, just toss it away. No cleanup needed! Round and rectangular sizes are available.
Buttercream Icing

The best tasting icing is also one of the most versatile for decorating. Buttercream icing is the most popular because you can do so many things with it—from covering the cake to piping borders or making flowers and most decorations.

Before you start decorating, you'll want to have a perfect batch of buttercream all ready. There are several easy ways to get buttercream icing:

**Wilton Ready-To-Use Decorating Icing**—Lets you get right to the fun of decorating without mixing and measuring. Available in delicious Vanilla or Chocolate, it's the only ready-to-use buttercream icing made for decorating. The perfect consistency for stars, flowers and more.

**Wilton Icing Mix**—In just minutes, you can whip up the ideal consistency buttercream icing for decorating. Easy to mix with milk and butter, easy to tint with Wilton Icing Colors.

**Wilton Buttercream Recipe**—Easy to make and adjust for consistency. See box at right.

This recipe is ideal for thick consistency icing used for making many flowers. Most decorations in this book are made with medium consistency icing—for medium, add 1 1/2-2 Tablespoons of light corn syrup. Ice cakes using thin consistency icing; for thin, add 3-4 Tablespoons of light corn syrup.

---

**Buttercream Recipe**

1/2 cup solid vegetable shortening
1/2 cup butter or margarine*
1 teaspoon Wilton Clear Vanilla Extract
4 cups sifted confectioners' sugar (approx. 1 lb.)
2 Tablespoons milk

Cream butter and shortening with electric mixer. Add vanilla. Gradually add sugar, one cup at a time, beating well on medium speed. Scrape sides and bottom of bowl often. When all sugar has been mixed in, icing will appear dry. Add milk and beat at medium speed until light and fluffy. Makes 3 cups.

Keep icing covered with a damp cloth until ready to use. For best results, keep icing bowl in refrigerator when not in use. Refrigerated in an airtight container, this icing can be stored for 2 weeks. Rewhip before using.

**For Chocolate Buttercream Icing:**

Add 3 oz. melted unsweetened chocolate and 1 Tablespoon more milk to Buttercream Icing recipe.

* Substitute all vegetable shortening and 1/2 teaspoon Wilton No-Color Butter Flavor for pure white icing and stiffer consistency.

---

WILTON FLAVORINGS

Kick up your icing's taste, without changing its consistency. Wilton has a great variety of luscious flavors with a true, natural taste—Pure Vanilla, Rich Butter, Almond Extract and more. The concentrated Wilton formula means you only add a little. You can create a luscious Crème Bouquet icing by substituting 1/3 teaspoon Clear Vanilla, 1/3 teaspoon Clear Butter Flavor and 1/3 teaspoon Almond Extract for all Vanilla in the Buttercream Icing recipe above.

Preparing the Bag

You're almost ready to decorate—time to prepare your bag with the right tip and fill it with icing. The type of bags you choose for decorating depends on the way you want to use them. Wilton Featherweight Bags are reusable and long-lasting. They're made of strong, flexible polyester. If you want to use a bag one time only and throw it away, go with convenient Wilton Disposable plastic bags or Parchment Triangles. (Note: You will need to form the parchment into a bag—the easy instructions are on the package.) For Featherweight or Disposable Bags, you'll also need a coupler to attach your tip to the bag. With a coupler, you can put a different tip on the same bag of icing. Have your tip ready and let's start.

1. **Remove the ring** from the coupler base. Drop the coupler base, narrow end first, into the bag and push it down as far as you can.

2. **Mark a spot** on the outside of the bag, 1/4 inch below the bottom screw thread (closest to tip).

3. **Push the base up** into the bag so that you can cut an opening at the mark.

4. **Push the base down** through the opening. One thread should be showing. Place a decorating tip over the part of the base which extends from the bag.

5. **Put the coupler ring** over the tip and twist it on, locking the tip in place.

WILTON DISPOSABLE DECORATING BAGS AND PARCHMENT TRIANGLES
So convenient, they're used in all Wilton decorating classes, beginning or advanced. Wilton Disposable Bags are made of flexible, easy-to-handle plastic; just refill them when your icing runs out during decorating. Wilton Parchment Triangles are easy to fold into bags for one-time use. The grease-resistant paper is safe to use with any icing. No cleanup necessary—toss them away when you're done. That gives you more time to practice decorating!

COUPLERS
Save decorating time with Wilton Couplers! Placed inside your bag, couplers let you secure and remove tips with ease. Wilton has the right style coupler to use with any type of tip—a standard coupler is fine for most decorating in this book.
6. Now you’re ready to fill the bag. While holding the bag with one hand, fold down the top with the other hand to form a generous cuff over your hand as shown.

7. With an angled spatula, fill the bag no more than half full of icing. Be sure not to overfill the bag—your icing may squeeze out from the other end!

8. Remove icing from the spatula by squeezing the bag with your thumb and fingers against the spatula and pulling the spatula out.

9. Close the bag by unfolding the cuff and twisting the bag closed. This forces the icing down into the bag.

“Burp” the bag to release any trapped air, by squeezing some icing out of the tip into your icing bowl just before decorating. Remember to “burp” after each refilling.

See more information on couplers and decorating bags.
Decorating Tips

All decorating begins with tips. These small metal cones have openings which are shaped to produce the designs you want when icing is squeezed through them.

The size or shape of the openings identifies the basic group, or family, to which the tip belongs and tells you the type of decorations the tip will create. Each tip in a family will produce an effect like its other family members.

We’ve listed the tips used in this book and some of the things you can do with them, below. Every tip can do many more things than we’ve described. Round Tips
Dots, Outlines, Printing and Writing
In this book, use round tips 2, 3, 4, 5, 7 and 12.

Star Tips
Stars, Pull-Out Stars, Star Fill-in, Rosettes, Zigzags
In this book, use star tips 16, 18, 21, 32, 1M.

Petal Tips
Bows, Flower Petals, Ruffles
In this book, use petal tip 104.

Leaf Tips
Leaves
In this book, use leaf tips 67 and 352. You can make plain, ruffled or stand-up leaves with any leaf tip.

Drop Flower Tips
Swirl Drop Flowers
In this book, use drop flower tips 129 and 225.

WILTON TIPS
Not all decorating tips are made the same. Wilton tips are made of rust-resistant, durable nickel-plated brass that retain their shape. Seamless design makes Wilton tips stronger and more precise.

DECORATING AND TIP SETS
Wilton has what decorators need in convenient sets. Our Basic and Starter Sets include many of the tips used in this book, plus bags, colors, couplers and more. Deluxe and Master Tip Sets collect the most-popular tips—use them to decorate just about any type of cake.

PRACTICE BOARD SET
Practice is the most important step of decorating. This is the kit all Wilton students use to get the most out of their practice time. Large color pattern sheets with vinyl overlays let you trace each type of decoration; a stand holds the pattern in the best decorating position. It’s the easiest way to check your progress—and watch your decorating skills improve!
Learn to Decorate

It's almost time to start decorating. But, before you begin, keep in mind that any decoration you make will be affected by the 3 key elements below.

1. Icing Consistency
   The texture of your icing determines what kind of decorations you will be able to make.

   Medium Icing is used for most decorations in this book—dots, stars, rosettes, drop flowers and more. This consistency helps you pipe the uniform designs that create a perfect border. To make medium icing, follow the basic Buttercream Recipe (p. 4) and add 1 1/2-2 Tablespoons light corn syrup.

   Thin Icing is used for writing, leaves and for frosting the cake. Add 3-4 Tablespoons of corn syrup to thin basic buttercream icing.

   You can also make Stiff Icing for flowers with upright petals using the recipe on p. 4. Adding more confectioners' sugar also makes buttercream stiffer.

2. Pressure Control
   Knowing how hard to squeeze and when to relax your grip on the bag is essential to perfectly-formed decorations. Your goal—learn to apply pressure so consistently that you can move the bag in an easy glide while just the right amount of icing flows through the tip. This will happen with practice.

   LIGHT MEDIUM HEAVY
   Pressure Pressure Pressure
   One tip gives you 3 different size decorations—depending on your pressure.

3. Bag Position
   By position, we mean holding your bag at the correct angle and direction. Angle is the position of the bag relative to the work surface. The two basic angles used in this book are 90° (straight up) and 45° (halfway between vertical and horizontal).

   90° Bag Position:
   Dots, Stars, Star-Fill-in,
   Rosettes, Swirl, Drop
   Flowers

   45° Bag Position:
   Outlines, Printing &
   Writing, Zigzags,
   Bows, Leaves

   Direction is where the back of the bag is pointed as you decorate. Think of the back of the bag as the hour hand of a clock. If instructions say to hold the bag at 6:00, hold the back of the bag toward you. For 3:00, hold the back toward the right, for 9:00, toward your left.

   (Note—lefties should hold the bag in the reverse direction stated.)
Round Tip Decorating

Dots
These easy decorations show up all the time—as confetti, facial features, buttons and more. If you can pipe a dot, you can make a ball. Just hold your tip in the icing as you squeeze to build up.

1. Practice with tip 3, using medium consistency icing. Hold the bag at 90°, with the tip slightly above surface. Squeeze the bag and keep point of tip in icing until dot is the size you want.

2. Stop squeezing the bag completely before you lift the tip from the dot.

3. Lift tip up and pull away from your piped dot.

Outlines
Designs are often outlined first, then piped in with stars or zigzags. The concept is like filling in the lines in a coloring book. Outline is used for facial features, too.

1. Practice with tip 3, using thin consistency icing. Hold the bag at 45° with back at 3:00 and the tip slightly above surface. Touch tip to surface. Raise the tip slightly and continue to squeeze.

2. Icing will flow out of the tip while you direct it along the surface.

3. To end, stop squeezing, touch tip to surface and pull away.

Printing & Writing

Messages are a must on birthday cakes, and they’re so much easier when you trace the pattern first or imprint using the Wilton Make-Any-Message Press Set.

Practice with tip 3, using thin consistency icing. Hold the bag at 45°, with back at 3:00 and the tip slightly touching surface.
You may pipe letters freehand, pipe over a pattern traced with a toothpick, or pipe after imprinting letters with a pattern press. If you are using a pattern press, let icing crust slightly, then imprint the message.

To print, using a steady, even pressure, squeeze out a straight line, lifting the tip off the surface to let icing string drop. To prevent tails from forming, be careful to stop squeezing before you touch tip to surface and pull away. Be sure the end of the tip is clean before you go on to another line.

For writing, steadily squeeze, gliding along the surface in a smooth, continuous motion. Remember to keep your wrist straight, moving your entire forearm in a single unit. Use your arm, not your fingers, to form each line, letter or word. After you begin to master the curves and swings of the letters, lift the tip up slightly as you write. You’ll find you have more control if you let the icing draw out slightly over the surface as you write.

WILTON PRESS SETS
Pipe perfect lettering and script! Beginning and professional decorators alike use Wilton Letter Presses to insure precise, even messages. Just imprint into your iced or fondant-covered cake, then pipe over the markings with icing.
Star Tip Decorating

Stars
Here is the #1 most popular decoration for kids birthday cakes! If you can pipe perfect stars, you're well on your way to completing a shaped character cake like a pro.

1. Practice with tip 16, using medium consistency icing. Hold the bag at 90°, with tip between 1/8 and 1/4 inch above surface, while using your other hand to hold the tip steady.

2. Squeeze the bag to form a star. Increasing or decreasing the amount of pressure changes the size of the star.

3. Stop squeezing the bag completely before you lift the tip from the star.

Pull-out stars add more dimension to your cake. To make them, use a star tip like #16 and hold the bag at a 45° angle to surface. As you squeeze out icing, pull tip up and away from cake. When your mound is high enough, stop pressure and pull tip away. Work from bottom to top of area to be covered with pull-out stars.

Star Fill-In
Shaped cakes often feature an outlined main character which is filled in with stars. A quick way to fill in the stars is to use the Wilton Triple-Star Tip #2010, which pipes three stars with every squeeze.

1. Follow tip and positioning directions for “Stars”. Pipe a row of stars evenly and close together. Adjust the tip position slightly each time so that the points of the stars interlock and cover the area without any gaps.

2. Pipe a row of stars beneath the first, again adjusting tip position to close any gaps.

3. Continue to fill in entire area.

Watch our video and learn how to make stars.
Rosettes
Rosettes are ideal candleholders—just pipe and position your candle in the center. They also look great finished with a center star or dot.

1. Practice with tip 16 using medium consistency icing. Hold the bag at 90°, with tip slightly above surface. Squeeze out icing to form a star and, without releasing pressure, move the tip in a tight complete rotation, starting at 9:00, moving to 12:00...
2. Then to 3:00 and 6:00...
3. And ending back at 9:00.
4. Stop pressure and lift tip away.

Zigzags
The easy up and down motion makes zigzags a fast way to fill in outlined areas or cover the entire side of your cake. Perfect for ribbed sweater and cuff effects, too.

1. Practice with tip 16, using medium consistency icing. Hold the bag at 45°, with back at 3:00 and tip lightly touching surface. Steadily squeeze and move your hand in a tight up and down motion.
2. Continue piping up and down with steady pressure. To end, stop pressure and pull tip away. For more elongated zigzags, move your hand to the desired height while maintaining a steady pressure. For a more relaxed look, just increase the width as you move the bag along.
3. Repeat as you move in a straight line with consistent up/down motion.
**Petal Tip Decorating**

**Bows**
Ideal for shoelaces on figure piped baby booties or as an enormous ribbon covering a cake top. You can also use a round or star tip to make a bow.

1. Practice with tip 104 using medium consistency icing. Hold the bag at 45° with back at 6:00 and tip with wide end touching surface, narrow end straight up. Squeeze, moving the tip up and around to the left and back to the starting point.
2. Continue around, making a second loop on the right.
3. The two loops will form a figure 8.
4. While holding bag in the same position, return to the center and squeeze out two streamers.

**Leaf Tip Decorating**

**Leaves**
The natural look of a leaf is very easy to achieve—your Wilton Tip 352 does most of the work! When you try the motion a few times, you’ll see how the tip forms the gentle curves and dimension of a leaf.

**Basic Leaf—Tip #352**
Practice with tip 352, using thin consistency icing. Hold the bag at 45°, with the back at 6:00 and the tip lightly touching surface. The wide opening should be parallel to surface.

**Veined Leaf—Tip #67**
Squeeze hard to build up the base, and at the same time, lift the tip slightly. Relax pressure as you pull the tip toward you, drawing the leaf to a point.

**Stand-Up Leaf—Tip #67**
Stop squeezing and lift away.

Drop Flower Tip Decorating

Swirl Drop Flowers
Quick, one-squeeze flowers can make a cake pretty in just minutes. What’s more, you can do these flowers in advance with Royal Icing, let them air dry, and save them until you need them.

1. Practice with tips 129 and 2, using medium consistency icing. Hold the bag at 90° with tip slightly above surface. Turn your wrist in toward you before piping. You will turn wrist a full twist. Starting with the flat of your knuckles at 9:00, as you squeeze out the icing, slowly turn your hand, with knuckles ending at 12:00.

2. Stop squeezing and lift the tip away.

3. Make a round tip 2 dot flower center, holding your bag straight up and keeping the tip buried as you squeeze. Stop squeezing, then pull your tip up and away.

Royal Icing
For decorations which dry candy-hard. Royal Icing is great for flowers like the drop flowers above—you can make them in advance, let dry and place right on your cake when you’re ready.

Keep mixing bowls and utensils grease-free—grease will break down this icing.

Cover royal icing bowls with a damp cloth while decorating to prevent crusting. Keep royal icing decorations away from bright light—colors may fade. Use more icing color than with buttercream to achieve the same intensity.

Royal Icing Recipe
3 Tablespoons Wilton Meringue Powder
4 cups sifted confectioners’ sugar (about 1 lb.)
6 Tablespoons water*
Beat all ingredients at low speed for 7-10 minutes (10-12 minutes at high speed for portable mixer) until icing forms peaks.
Makes 3 cups.
*When using large countertop mixer or for stiffer icing, use 1 Tablespoon less water.
Serve Up Teddy's Treats

We've got a scoop—you can bake cupcakes right inside ice cream cones! Decorate them easily with colorful swirl "scoops" on top. Passing out those cool cones is everyone's favorite—the cuddly teddy bear. He's cute as can be, dressed up with an easy figure 8 bow.

Cake Serves 12, Cones 1 each.

- Pans: Huggable Bear; Standard Muffin
- Tips: 3, 7, 18, 32, 104
- Colors: Kelly Green, Lemon Yellow, Rose, Black
- Recipe: Buttercream, Chocolate Buttercream Icing, p. 4
- Also: Cake Board; Fanci-Foil Wrap; Disposable Decorating Bags;

1. Line muffin pan with aluminum foil to support ice cream cones. Position one dozen cones in pan and fill 1/2-2/3 full with batter. Bake 20-25 minutes at 350°F. Let cool.

2. Pipe zigzag motion on cupcake tops using tip 32 and yellow, pink and green icing.

3. Bake and cool bear cake. Outline eyes, nose and mouth using tip 3 and black icing. Pipe in eyes and nose with tip 7 (smooth with finger dipped in cornstarch).

4. Cover cake with stars using tip 18 and light and dark brown icings.

5. Position decorated cone in paw area. Pipe stars over cone for paw using tip 18 and dark brown icing; overpipe paw to create dimension.

6. Pipe bow using tip 104 (wide end down) and green icing. Pipe outline numeral "1" using tip 18 and dark brown icing.

CHECKLIST
- cake ice cream cones; aluminum foil; cornstarch
- Make 1 1/2 cups buttercream icing, 2 3/4 cups chocolate buttercream. Tint as follows: 1/4 cup green, 1/4 cup yellow, 1/4 cup rose, 1/4 cup black, 3/4 cup light brown (mix half white with half chocolate).

Celebrate with Swirls

There's so much texture and motion going on in this easy cake! Jumbo rosettes and stars seem to burst from the surface—tip 1M makes them extra large for you. You'll also use the decorating comb on the sides for a neat, professional touch.

Serves 12.

CHECKLIST
- Pan: 8 x 2 in. Round
- Tips: 1M, 18
- Colors: Rose, Lemon Yellow
- Recipe: Buttercream Icing, p. 4
- Also: Decorating Comb; Cake Board; Fanci-Foil Wrap; Rainbow Jimmies; 8 in. Spatula; Assorted Celebration

Candies; Disposable Decorating Bags
- Make $7\frac{3}{4}$ cups of buttercream icing
  Tint as follows: $2\frac{3}{4}$ cups pink, 4 cups yellow; Reserve 1 cup white

1. Bake and cool one 2-layer cake. Ice smooth with spatula and yellow icing.

2. Run small-tooth side of Decorating Comb over cake sides to form ridges.

3. Pipe rosettes on cake top using tip 1M and rose icing.

4. Pipe star bottom border using tip 1M and rose icing.

5. Pipe smaller rosettes around cake sides, 2 inches up from the bottom border, using tip 18 and white icing.

**Catch of the Day**

It’s no fish story—this cake is decorated without tips, but it’s clever enough to hook any crowd. You’ll use the spatula to create the scales on top, then add candies for all the features.

**Serves 6.**

**CHECKLIST**

- Pan: 8 x 2 in. Round
- Colors: Leaf Green, Lemon Yellow
- Recipe: Buttercream Icing, p. 4
- Also: Cake Board; Fanci-Foil Wrap; 8 in. Spatula; orange and red jelly candy slices; spice drops; large gumball;
- mini candy-coated chocolate dot; granulated sugar, rolling pin
- Make 3 cups of buttercream icing and tint green/yellow combination

1. Prepare board following pattern and instructions below. Bake and cool 1-layer round cake. Combine green and yellow icing colors to tint icing. Using spatula, ice top in an up and down scallop motion to create a scale effect, then ice sides bringing down the same motion. Attach candy-coated chocolate to gumball using a dot of icing; position on cake.

2. Cut spice drops horizontally in half. Place in granulated sugar and flatten with a rolling pin.

4. Position two orange slices for side fins. Position orange slices stacked three high on cake sides for top and tail fins.

Enlarge A & B patterns 200%, then cut out. Trace 8 in. pan on a 14 in. diameter cake board. Trace A & B in position against 8 in. tracing on 14 in. board. Cut out fish-shaped board.

- 10 in. Round Cake Board; Fanci-Foil Wrap; Disposable Decorating Bags
- Make 7 1/4 cups of buttercream icing. Tint as follows: 3/4 cup green, 3/4 cup rose, 3/4 cup orange, 2 cups yellow; Reserve 3 cups white
- Pan: 8 x 2 in. Round
- Tips: 3, 16, 21
- Colors: Leaf Green, Orange, Lemon Yellow, Rose
- Recipe: Buttercream Icing, p. 4
- Also: Star Nesting Cutter Set; Hot Colors Wavy Sparkler Candles;

### Instructions

1. Bake and cool 2-layer round cake. Use spatula to ice cake smooth. Imprint largest star cutter in center of cake top.

2. Randomly imprint second smallest and smallest star cutters around cake sides and top. To imprint stars which overlap from top to sides, start by lightly imprinting the top cutter area, then tilt the lower cutter area vertically down the side to imprint there. Outline stars using tip 3 and green, orange, yellow or rose icing.

3. Fill in imprints with stars using tip 16 and green, orange, yellow or rose icing.

HAPPY BIRTHDAY
Make Her Dream Come True

Every fairy tale has a happy ending...and her birthday will too when she sees this spectacular castle cake. Covered with bright candy trims and ice cream cone turrets, it's a royal treat fit for a princess. What better way to let a little girl know she rules!
